Purposeful Strategies for Culture-Rich Language Learning

The Berkeley World Language Project (BWLP) provides sites and districts with interactive, high-impact professional development tailored to the needs of your educators. We align our work with the 2019 California World Languages Standards and Framework, and center effective strategies that foster student engagement, language proficiency, and culturally responsive teaching.

- Use innovative strategies and activities to engage students and foster collaboration.
- Foster an inclusive, culturally rich curriculum.
- Apply scaffolding techniques and authentic resources to enhance literacy and learning.
