

What do you think the enrollment trends at Berkeley (undergraduate and graduate combined) have been from 2006 to 2016

Hint: Three languages had around 200 enrollments in 2006 (Arabic, Portuguese, Russian), so the percentage increase or decrease will be more dramatic.

Definitions: "A lot" = 25% or greater "A little" = 24% or less

1) What do you think are three structural things that best support language instructors who are TAs, lecturers, or adjuncts? (For example, common syllabi). Don't limit yourself to what's available at Berkeley.

2) There can be advantages and disadvantages when the teaching of a language is the exclusive purview of a department or area studies center. Jot down a few. Again, don't limit yourself to Berkeley.

Advantages:

Disadvantages:

3) What is the range of activities and functions of language centers on large campuses such as Berkeley?

4) Language centers need structural support to function optimally. What might some be? Think, for example, about the relation of departments to the center.

Concluding thought questions, **not** for sharing with the group. From your perspective, what changes are desirable at Berkeley as far as language teaching and the Language Center are concerned? Whose role is it to attend to these matters? How might you (working with others) advocate these improvements?
